

Rules and Logic

Ari	Dragon	Result
Attack	Attack	Both HP Decrease (according to the value of each attack).
Attack	Defense	1. Player Attack > Dragon Defense = Dragon HP Decrease (according to the difference between the existing value). 2. Player Attack < Dragon Defense = Player HP Decrease (according to the difference between the existing value). 3. Player Attack = Dragon Defense = Nothing Happen.
Attack	Heal	1. Player Attack > Dragon Heal = Dragon HP Decrease (Dragon HP decrease according to the difference between the existing value). 2. Player Attack < Dragon Heal = Dragon HP Increase (Dragon HP increase according to the difference between the existing value). 3. Player Attack = Dragon Heal = Nothing Happen.
Defense	Attack	1. Player Defense > Dragon Attack = Dragon HP Decrease (according to the difference between the existing value). 2. Player Defense < Dragon Attack = Player HP Decrease (according to the difference between the existing value).

		3. Player Defense = Dragon Attack = Nothing Happen.
Defense	Defense	Nothing Happen.
Defense	Heal	Dragon HP Increase (according to the heal value).
Heal	Attack	1. Player Heal > Dragon Attack = Player HP Increase (according to the difference between the existing value). 2. Player Heal < Dragon Attack = Player HP Decrease (according to the difference between the existing value). 3. Player Heal = Dragon Attack = Nothing Happen.
Heal	Defense	Player HP Increase (according to the heal value).
Heal	Heal	Both Player HP Increase (according to the heal value).

Note and Hint

1. Game ini didasarkan pada game Yu Gi Oh yang pernah saya mainkan di console PS 2 (tentunya dengan modifikasi).
2. Nilai attack dan defense bersifat random antara 1 – 20 poin (berlaku untuk pemain dan sang naga).
3. Nilai heal pasti 5 poin.
4. Semua dampak yang didapatkan didasarkan atas selisih antara attack, defense maupun heal.
5. Nilai HP tidak mungkin berubah menjadi negatif dan HP tidak mungkin lebih dari 100 poin.
